

**Pages 15-16, Design Sequence 2: CPR Guns, L – Ammunition, 10 - Chemical (clarification/omission):** The price multiplier for a chemical round is 2. Refer to the Smoke round above to determine the gas cloud size for a chemical round. The actual cloud size is determined by using Striker Book 1 Rule 23: Firing sheaf and Beaten Zone on pages 39-40 and the Beaten Zone Table on the seventh page of the Useful Tables book. The duration that chemical agents remain active is determined using Striker Book 2 Rule 65: Chemical Warfare pages 33-34.
